

RONTEK[®]

STREAMER

AIRON STREAMER PRO

SERIES HD STREAMER DAC

It is an advanced wireless audio streaming board that provides Airplay2, WiFi, Spotify Connect, Tidal Connect, Bluetooth 5.0 aptX HD, DLNA and UPnP connectivity. With this device, you can easily stream music from your smart devices, NAS, and various online streaming services such as Spotify, Apple music, Amazon music, Tidal, Deezer, and more.

The Up2Stream HD DAC is capable of streaming and outputting high-quality music in sample rates of up to 192kHz/24bits, ensuring an exceptional listening experience. Additionally, it comes with both analog and digital input and output, making it an ideal choice for building your own high-res wireless audio system.

KEY FEATURES

- Linear power supply - clean linear power supply using toroidal transformer
